

FREDERICO

Resume

Objetivo: Consultant SAP Sênior

SKILLS

SAP/BW – HANA (Advanced)

SAP BASIS - (Advanced)

SAP Ariba - (Advanced)

SAP BTP - (Knowledge in development / Continuing education)

SAPGRC (Intermediate)

Azure/Databricks (Advanced)

Alteryx (Advanced)

SQL (Advanced)

Python (Intermediate)

ABAP (Intermediate)

PROFESSIONAL EXPERIENCE

Accenture – Digital Analyst – Software Engineer

📍 Feb/2017 – Feb/2018 – Recife, Brazil

Provided technical support for SAP BW and SAP HANA environments in projects such as COMGÁS, CEMAR, and NEOENERGIA.

Monitored and resolved issues in daily data load process chains (DTPs and InfoPackages), ensuring operational stability.

Developed analytical views in HANA Studio integrated with BW for consumption via BEx and BI tools. Conducted performance analysis and implemented optimizations in queries and data structures.

DMS Logistics – BI Analyst

📍 Sep/2018 – Jan/2019 – Rio de Janeiro, Brazil

Created real-time dashboards, queries, and reports using Power BI for aviation and maritime industry clients.

Focused on developing analytical skills and strengthening proficiency in BI tools and SQL during the internship

Accenture – Digital BI – Application Development Associate

📍 Feb/2019 – Aug/2021 – Rio de Janeiro, Brazil

Developed and maintained InfoObjects, DSOs, and InfoCubes with tailored data modeling for analytical reporting.

Built and optimized BEx queries using formulas, variables, conditions, and structures to support strategic analysis.

Actively participated in SAP BW version upgrades (from 3.x to 7.x), including transformations, DTPs, infoSources, and process redesign.

Performed technical adjustments in Process Chains, ABAP routines, and transformation rules.

Handled troubleshooting and deep analysis using RS* tables.
Created MultiProviders and Composite Providers to integrate data from multiple sources into consolidated management views.
Transported development objects using SAP Transport Organizer

Ernst & Young (EY) – Senior Data Engineer

📍 Aug/2021 – Jun/2023

Led the development and automation of data workflows in projects for Mondelez and Unilever, primarily using Alteryx.
Migrated pipelines and data processes to Azure Cloud, focusing on flow restructuring and performance improvement.
Contributed to the automation of analytical and statistical models in the Vale IA Center project, using Python, SQL, and R to process large-scale data environments..

Locaweb / LWSA – SAP Basis Consultant Senior

📍 Aug/2023 – Present – São Paulo, Brazil

Senior SAP Basis consultant responsible for the implementation and support of **SAP Ariba**, both for internal use and across the Locaweb group of companies.
Acted as a key technical/functional point of contact for SAP Ariba, working on integration with other SAP modules (e.g., ECC, BW), customizing configuration settings, and enabling Ariba Network functionalities to optimize procurement processes.
Monitored Ariba's system health and interfaces, ensuring data synchronization, uptime, and SLA compliance.
Conducted **CVE (Common Vulnerabilities and Exposures)** assessments, applying security notes, kernel updates, and support packages to strengthen SAP system security.
Participated in audit and governance committees, contributing to compliance definitions and access control policies.
Managed critical access roles and profiles, aligned with information security best practices.
Oversaw monitoring of SAP systems (ECC, Ariba, BW, etc.) via Jump Server, ensuring performance, availability, and operational continuity.
Supported process automation initiatives using **SAP IRPA (Intelligent Robotic Process Automation)**, developing and maintaining bots to streamline internal operations.

Academic Background

Universidade Estácio de Sá – Análise de Sistemas

2019 – 2024

Courses and Certifications

Databricks Lakehouse Fundamentals – Nov.22

SAP Business Technology Platform - Jun.2025
