Professional Summary

Full Stack Developer with extensive experience in .NET Core, React, Angular, Azure, and both relational and non-relational databases. Strong background in DDD and SOLID architectures, RESTful APIs, and agile methodologies. Recent experience with Generative Artificial Intelligence and Agent IA integration in corporate systems.

Proactive and collaborative professional with a consistent record of delivering projects for international and national clients in finance, healthcare, insurance, industrial, and technology sectors.

Certifications

- Foundational C# with Microsoft
- MBA in Software Engineering – Federal University of Rio de Janeiro (UFRJ)
- Advanced English | Basic Spanish

Professional Experience

Developer – Marlabs (current – international project)

Technologies: .NET Core, React, React Query, TypeScript, SQL Server, GitHub, Azure DevOps

- Developed corporate applications for CyberSheath with a focus on performance, security, and usability.
- Implemented Generative AI Agents (Agent IA) to automate technical support and data analysis processes.
- Integrated systems through REST APIs and message queues.

Developer – Stefanini

Technologies: .NET Core, Razor Pages, Azure, Salesforce

- Developed and maintained corporate systems integrated with Salesforce.
- Implemented CI/CD pipelines in Azure DevOps and optimized API performance.

Developer – DEAL Technologies

Technologies: .NET Core, React, Angular, Azure, RabbitMQ, Redis

- Developed enterprise solutions for Porto Seguro, BASF, Mercedes-Benz, and Shell (LTM/Vertem).
- Participated in automation projects using Generative AI agents, applying language models to improve data analysis and workflow efficiency.
- Applied DDD and SOLID principles in distributed architectures.

Systems Analyst – Trust TI Soluções em Informática (2011 – 2020)

Technologies: C#, ASP.NET, SQL Server, React, Bootstrap, Entity Framework

- System analysis and development, team coordination, and system maintenance.
- Created dashboards and management systems integrated with SQL Server.

Systems Analyst – Petrobras / Spassu (2011 – 2012)

Technologies: Java, Flex, C#, Oracle, SVN, IBM Tools (Lotus Notes, ClearCase)

- Developed and maintained internal corporate systems.
- Integrated process monitoring and control modules.

Systems Analyst – Bank Pactual / FunBIO – Elumini (2010 – 2011)

Technologies: .NET Framework, C#, Azure, SQL Server, LINQ, Entity Framework

- Developed financial and administrative systems focused on reliability and scalability.

Developer – American Bank Note (2007 – 2010)

Projects: Detran-RJ, Federal Economic Council, TJRJ, Federal Police

- Developed civil and criminal identification systems using .NET and Oracle technologies.

Developer – Hospital Evangélico Regional (2006 – 2007)

Technologies: Java, MySQL

- Developed and maintained hospital management and patient control systems.

Education

- MBA in Software Engineering – Federal University of Rio de Janeiro (UFRJ) – 2009–2010

- Bachelor's Degree in Systems Analysis – Estácio de Sá University – 2000–2004

Technical Skills

Languages: C#, Java, VB.NET, JavaScript, TypeScript, SQL

Frameworks: .NET Core, ASP.NET MVC, Blazor, React, Angular, Xamarin

Architecture: DDD, SOLID, CQRS, REST APIs, Microservices

Databases: SQL Server, Oracle, MySQL, MongoDB, Redis

Tools: Git, Azure DevOps, RabbitMQ, XUnit, Fluent API, Sensedia

Cloud & DevOps: Azure, Docker, GitHub Actions

Generative AI: OpenAI API, Agent IA integration, cognitive automation

Methodologies: Scrum, Kanban, Agile Development

Additional Courses

- Conectiva Linux 9, JSP, Servlet, JSTL

- Systems Development Techniques – PUC-Rio
