Profile

My path towards Software Development surfaced during high school after transitioning to a technology focused curriculum, cultivating my interest in computers and logic. After guidance steered me to Computer Science, I undertook a national exam, earning a scholarship funded by the government for my degree. This achievement, paired with the completion of my degree, cemented my foundation as a Software Developer and marked a proud milestone in my career journey.

Professional Experience

Software Developer

Kneat Solutions

Jul 2022 – present | Limerick, Ireland

A platform that streamlines the process of authoring, reviewing, approving, and testing documents online, providing a compliant environment for managing final deliverables alongside comprehensive reporting dashboards.

- Introduced the ability to add multiple placeholders on various types of entities during document template creation, enhancing the flexibility and usability of the template design process
- Enabled user-specific editing of property values within a document, preventing automatic replacement with default values, and providing users more control over their content
- Added a new attribute property type allowing users to link references to other workspace objects, enhancing traceability and embeddedness within documents
- Implemented the capacity to move a document within or across workspaces, or to folders of different types, offering more organizational flexibility
- Led daily stand-up meetings and collaborated with other teams in addressing any blockers or impediments, fostering a conducive work environment, and ensuring seamless project progression
- **Key skills:** .Net Core, C#, ASP.NET, Azure, Azure DevOps, CI/CD, Clean Architecture, Clean Code, Dependency Injection, Design Patterns, DevOps, DRY, Entity Framework, Facade, Git, IIS, MSSQL, npm/yarn, NUnit, OOP, Pair Programming, React.js, RxJS, Scrum, Single Page Application, SOLID, SPA, SQL Server, SwaggerUI, Unit test, VisualStudio, VisualStudioCode, WebAPI, Windows

Senior Fullstack Software Developer (Freelancer) ThreeO

Feb 2023 – Dec 2023 | São Paulo, Brazil

Cooperative service management platform that provides a faster service delivery, streamlines membership management, integrates seamlessly with legacy systems, and facilitates easy loan calculations with various rates and installments.

- Developed a background worker to close all open tickets in a certain status after a specified number of days, enhancing efficiency in ticket management
- Implemented a user-friendly registration feature in the app, generating a ticket for an attendant for processing and follow-up, improving user experience and support
- Enabled digital signing of documents by integrating with DocuSign and D4Sign, updating ticket status based on user responses, accelerating the document approval process
- Streamlined loan approval process by integrating with a third-party system to retrieve credit scores and display them on the credit form, aiding attendants in decision-making
- **Key skills:** .Net Core, C#, JavaScript, Angular 2+, ASP.NET, Azure, Azure App Insights, Azure DevOps, CI/CD, Clean Architecture, Clean Code, Dart, Dependency Injection, Design Patterns, DevOps, DRY, Entity Framework, EventBus, Facade, Firebase, Flutter, Git, Hooks, HTML5/ CSS3, JSON, npm/yarn, NUnit, OOP, Pair Programming, PostgreSQL, Repository Pattern, RxJS, Scrum, Service Worker, SignalR, Single Page Application, SOLID, SPA, SwaggerUI, Typescript, Unit test, VisualStudio, VisualStudioCode

Senior Fullstack Software Developer ThreeO

Dec 2020 – Jun 2022 | São Paulo, Brazil

A platform that delivers accelerated service, seamless integration with legacy systems, easy loan calculation with various rates and installments, and efficient member management in the realm of cooperative service.

- Developed a notification routine based on configurable templates, sending alerts via email and SMS, thereby enhancing communication efficiency
- Accommodated customer-specific needs by designing and customizing new workflows to better align with the credit union operations
- Implemented a feature prompting users to update their personal information within a set period, ensuring up-to-date user data
- Created a background worker that streamlined the insurance quote process by monitoring an email inbox, extracting information from attached PDFs, and initiating a ticket for prompt customer service

- Developed a routine to read a PDF file from a legacy system, and split it into individual yearly statements per user, uploaded the data to cloud storage, and linked the document to the respective user in the database, ensuring secure and organized data management
- **Key skills:** .Net Core, C#, JavaScript, Angular 2+, ASP.NET, Azure, Azure App Insights, Azure DevOps, CI/CD, Clean Architecture, Clean Code, Dart, Dependency Injection, Design Patterns, DevOps, DRY, Entity Framework, EventBus, Facade, Firebase, Flutter, Git, Hooks, HTML5/ CSS3, JSON, npm/yarn, NUnit, OOP, Pair Programming, PostgreSQL, Repository Pattern, RxJS, Scrum, Service Worker, SignalR, Single Page Application, SOLID, SPA, SwaggerUI, Typescript, Unit test, VisualStudio, VisualStudioCode, WebAPI, Windows

Senior/Mid-level Fullstack Software Developer Confitec

Jun 2018 – Sep 2020 | São Paulo, Brazil

Risk analysis and fraud combat solution for the insurance industry, offering connection to the company's operating system and robust workflow management for inspection processes.

- Implemented a synchronization routine to transfer information between the app and platform, and carried out a refactoring process to optimize performance for both incoming and outgoing data, ensuring efficient operation even in areas with poor connections
- Introduced a feature enabling users to draw polygons on a map to delineate the inspected area, enhancing the precision of location reporting
- Developed an integration with a legacy system to receive insured area data, allowing it to be displayed on the map during inspections for improved context
- Created a method to capture metadata from photos, providing evidence to the insurance company that the picture was taken at the reported location
- Designed a feature on the app allowing users to attach documents or capture photos directly within a form, streamlining the process of data collection and enhancing user experience
- **Key skills:** C#, JavaScript, ASP.NET, AngularJS, Cordova, Dependency Injection, Design Patterns, DevOps, DRY, Entity Framework, Facade, Git, Google Maps API, HTML5/ CSS3, IIS, Ionic, JSON, Mac OS X, MSSQL, npm/yarn, OOP, Pair Programming, Scrum, Single Page Application, SOLID, SPA, SQL Server, SQLite, TFS, VisualStudio, VisualStudio Code, WebAPI, Windows, Xcode

Mid-Level Fullstack Software Developer CTIS

Oct 2017 – May 2018 | São Paulo, Brazil

Registration service catering to businesses supplying goods to the Free Trade Zone of Manaus.

- Implemented a calendar into the application, enabling attendants to effectively manage their daily schedules
- Constructed forms to capture and register personal information from contractors offering their services, streamlining the registration process
- Developed a page where contractors can check the status of their registration, enhancing transparency and communication
- Designed a dynamic form that adjusts displayed fields based on prior selections, improving user experience and efficiency
- **Key skills:** C#, JavaScript, Angular 2+, ASP.NET, Dependency Injection, Design Patterns, DRY, Entity Framework, Git, HTML5/ CSS3, JSON, MSSQL, OOP, Pair Programming, Repository Pattern, RxJS, Single Page Application, Singleton, SOLID, SPA, SQL Server, TFS, Typescript, VisualStudio, WebAPI, Windows

Courses

Modelling Rich Domains

desenvolvedor.io

2023 – 2023

How to develop and build, business-focused enterprise applications, introducing concepts and patterns such as DDD (Domain-Driven Design), CQRS (Command Query Responsibility Segregation), Event Sourcing, Ubiquitous language, Architectural patterns (Onion, 3-tier, Ports & adapters), and others. Pillars needed to design modern and distributed architectures.

Fundamentals of Software Architecture

desenvolvedor.io

2022 – 2022

Object-oriented Programming (inheritance, abstractions, polymorphism, encapsulation), SOLID, Dependency injection, Clean Code, Design Patterns (Creational, Structural, Behavioural), Architectural patterns (3-tier, Onion, Ports & adapters).

C# Advanced Topics

Udemy

2017 – 2017

Generics, Delegates, Lambda expressions, Events, Extension methods, LINQ, Nullable types, Dynamic, Exception handling, Async/Await.

Entity Framework in Depth: The Complete Guide

Udemy

2017 – 2017

Building a model Database- First and Code-First, Querying using LINQ, Related Objects, and Updating data.

Learning Angular with TypeScript

Udemy

2017 – 2017

Typescript: Inference type, Classes, Inheritance and Overriding methods, Interfaces, Generics. Angular: Routing, Modules, Components, Interceptors, Async methods with Promises, Two-way databinding, Observables, Services, DI, Lazy loading.
