ABOUT ME

I am a Developer with over six years of experience designing and implementing scalable, high-performance solutions across multiple industries. Since 2019, I have specialised in Salesforce development and customisation, combining strong analytical skills with a passion for building efficient, user-centred applications.

EDUCATION

IFSUL 2015 - 2018

Technical Course in Web Development

- Focused on software engineering fundamentals, web application development, and database management.
- Emphasis on front-end and back-end programming, responsive design, and object-oriented analysis.

PUCRS – Pontifical Catholic University 2019 - 2025

Comprehensive programme covering algorithms, data structures, software engineering, databases, artificial intelligence, and system architecture. Emphasis on practical software development, agile methodologies, and innovative problem-solving through real-world projects.

CERTIFICATIONS

Associate | Platform Developer I | Platform Developer II

LANGUAGES

Portuguese (Native) & English (Professional)

ADDITIONAL INFORMATION

- Advanced knowledge of web development and web services, including REST and SOAP architectures. Skilled in JavaScript, TypeScript, HTML, CSS, and responsive design.
- Proficient in frontend development using Angular, and experienced in backend development with Node.js, Python, Go (Golang), Java and others languages.
- Strong expertise in Salesforce technologies, including Apex, Visualforce, Lightning Web Components (LWC), asynchronous and synchronous integrations, Force.com API, deployments, and SOQL.
- Experienced in SQL Server and NoSQL databases such as MongoDB. Solid foundation in object-oriented software design and agile development methodologies.
- Committed to code quality and best practices, with experience conducting code reviews, implementing unit and functional testing, and ensuring maintainable, scalable solutions.
- Strong collaboration and leadership skills, including mentoring teammates, supporting technical decisions, and leading small development initiatives to ensure consistent delivery standards.

WORK EXPERIENCE

Full-Stack Developer | DBServer

Jun 2019 – Dec 2021

Contributed to university projects for PUCRS and UFRGS, gaining full-stack experience in web development and modern frameworks.

- Developed dynamic front-end applications with Angular, focusing on usability and responsive design.
- Implemented RESTful APIs using Node.js and Express.js, integrating with MongoDB, Prisma, and MySQL.
- Applied secure authentication mechanisms, including JWT-based solutions.
- Worked within agile teams using Git and JIRA for version control and task management.
- Delivered robust, production-ready solutions aligned with academic and institutional requirements.

Salesforce Developer | SR Consulting

Mar 2021 – Jul 2023

Developed and supported multiple Salesforce solutions across diverse projects, focusing on automation, scalability, and maintainable code.

- Designed Apex codebases and integrated front-end components using LWC, Aura, and Visualforce.
- Built Flows, Validation Rules, Reports, and Dashboards to streamline operations.
- Created and maintained thorough documentation to support project continuity.
- Led internal sessions promoting innovation and technical learning.
- Collaborated in agile environments to optimise delivery and communication.

Salesforce Developer | Portobello

Jul 2023 - Sep 2024

Led Salesforce development initiatives that enhanced internal processes, team collaboration, and user engagement across the organisation.

- Built Apex solutions and front-end components using LWC, Aura, and Visualforce.
- Managed administrative settings such as Profiles, Permissions, Validation Rules, Flows, and Reports.
- Authored detailed documentation for all implemented solutions.
- Delivered internal Tech Talks to share innovations and best practices.
- Supported agile planning, ensuring balanced task distribution and on-time delivery.

Salesforce Developer | Orion CX

Sep 2024 - Nov 2024

Contributed to the design and implementation of scalable Salesforce solutions, acting as both developer and administrator to support critical business operations.

- Designed and implemented Apex classes, Triggers, Queueables, and REST Services.
 - Led migrations between Sandbox and Integration environments.
 - Supported complex deployments and provided technical guidance to the team.
 - Worked directly with clients to refine and deliver efficient, practical solutions.
-

WORK EXPERIENCE

Salesforce Developer | SR Consulting

Nov 2024 - Dec 2025

Delivered a Salesforce implementation for PagBrasil, focusing on enhancing user experience and improving business process automation.

- Created custom interfaces using LWC, Aura, and Visualforce.
- Designed Approval Processes, Reports, and Dashboards for business insights.
- Configured administrative elements such as object permissions and custom settings.
- Participated in client meetings to validate deliverables and ensure alignment with business goals.

Salesforce Developer | BairesDev

Jul 2025 - Oct 2025

Worked as part of the Top Talent Pool, supporting Salesforce projects for international clients and contributing to solution design and delivery in fast-paced, agile environments.

- Conducted client meetings to gather requirements and provide progress updates.
- Developed Salesforce components tailored to business needs and system constraints.
- Supported teammates through technical assistance and collaborative problem-solving.

Salesforce Developer | Accenture

Mar 2025 – Present

As part of an international Salesforce team, I design and maintain scalable CRM solutions for enterprise clients. My role bridges technical delivery and collaboration with cross-functional teams, ensuring the highest standards of quality and efficiency.

- Develop and maintain Apex solutions (Triggers, Batches, Queueables, Invocables, REST Callouts, Unit Tests).
- Build user interfaces using Lightning Web Components (LWC), Aura, and Visualforce.
- Manage Salesforce administration, including Profiles, Permissions, Validation Rules, Flows, and Reports.
- Prepare and maintain technical documentation to improve transparency and onboarding.
- Collaborate with global teams and clients, conducting meetings and planning sessions in English.
