## Professional Summary

Data Science and BI Specialist with strong experience in dashboard architecture, process automation, and data integration. I excel at translating business goals into scalable, high-performance data solutions. I have led strategic projects across Transportation & Trade Global Operations, Commercial, HR, and Digital Innovation in companies such as Johnson & Johnson, Organon, and Aliança Divergente. My technical toolkit includes Python, SQL, Power BI, Azure, and Databricks, supported by an analytical mindset, fast learning ability, and a collaborative leadership style. I seek remote or international opportunities focused on data-driven innovation and digital transformation.

## Professional Experience

### Aliança Divergente — Data Scientist (Remote | Feb 2025 – Present)

- Developed behavioral analysis and user segmentation for large-scale educational programs.
- Created churn and cancellation indicators using Power BI and DAX with time-based modeling.
- Led data structuring projects to support growth, product, and IT teams at Universidade Divergente.
- Implemented tracking systems for audio engagement using conditional logic and business rules in DAX.
- Designed dashboards with ML projections, interactive filters, and personalized recommendations.

### Johnson & Johnson (via Algar TI) — Data Analyst – Global Transportation & Trade Operations (Nov 2024 – Feb 2025)

- Built automated reports for global logistics performance, integrating time, cost, and error KPIs.
- Supported the global team with real-time decision dashboards using Azure SQL and Power BI.
- Identified bottlenecks through statistical analysis and exploratory insights using Python.

#### **Blackhawk Network — Project Manager / Process Analyst (May 2024 – Nov 2024)**

- Automated sales reporting via Power BI, increasing accuracy by 15% and reducing preparation time by 80%.
- Developed B2B/B2C data pipelines, enabling strategic dashboards for key stakeholders.
- Improved project delivery SLA by 20% through enhanced interdepartmental communication.

#### **Johnson & Johnson / Algar TI — BI and Process Analyst (Dec 2021 – Apr 2024)**

- Reduced KPI reporting time by 90% through Power BI automation.
- Implemented data governance standards, improving consistency and accuracy in strategic reporting.
- Worked in agile teams to align business, technical, and operational goals.

#### **Organon / MSD — HR & Analytics Intern (Apr 2020 – Sep 2021)**

- Developed HR dashboards and performance KPIs, receiving recognition for exceeding expectations.

#### **Órigo Energy — Administrative Intern (Feb 2019 – Oct 2019)**

- Managed land acquisition documentation and project tracking using IFS ERP.

#### **Institute for Aeronautics and Space (IAE) — Data Research Intern (Jan 2015 – Jul 2015)**

- Conducted data analysis on meteorological patterns using Python and statistical tools.

### **Education & Certifications**

#### **Education**

- MBA in Big Data and Business Analytics — FGV
- Bachelor's in Accounting — Faculdade Católica Paulista
- Supplemental Business Administration — PUC Campinas
- Data Analytics Certificate — Última School
- Financial & Investment Management — IBMI

#### **Certifications**

- Power BI Expert — Viscari
- DW, SSIS, ETL — Udemy / Alura
- Scrum Foundation — CertiProf
- Lean Six Sigma Yellow Belt — FM2S
- Data Visualization for Storytelling — LinkedIn
- Agile Manager, Software Engineering, Python — Alura / DevSamurai

#### **Key Skills**

- Languages & Tools: Python, SQL, DAX, R, Power BI, Tableau, Advanced Excel, Git
- Visualization & Storytelling: Power BI, Matplotlib, Seaborn, Streamlit, Executive & Gamified Dashboards

- Big Data & BI Stack: Hadoop, Spark, PostgreSQL, Azure SQL, Databricks, REST APIs
- Soft Skills: Analytical Thinking, Complex Problem Solving, Diplomatic Communication, Collaborative Leadership, Systemic Vision, Adaptability, High Autonomy

### Relevant Projects

- Sales Dashboard – Power BI: Automated B2B and B2C reporting with strategic insights for executive decision-making.
- CDI Profitability Calculator – Python: Interactive tool using Central Bank data to simulate and analyze historical CDI profitability.
- FIFA Analytics Project – Streamlit: Analyzed player and team performance (2017–2023) with interactive filters, clustering, and ML projections.
- Audio Engagement Tracking – Power BI & DAX: Logic-driven KPI to monitor time until the 7th audio engagement based on onboarding and client category rules.
- Churn & Cancellation Monitoring System: Time-based metrics and weekly comparisons to support strategic planning at Universidade Divergente.
