

VANESSA SALLES WILHELMSSEN

PRESENTATION

Brazilian from São Paulo, single, available for travelling, written and oral communication skills with all areas, multi-cultural and different time zones experience. Because of consulting work I had lived in the following cities: São José dos Campos, Santos, Sorocaba, Jaguariúna, Campinas, Salvador, Porto Alegre, Rio de Janeiro, Manaus, Londrina, São Paulo, Luanda (Angola), San Salvador (El Salvador), Eindhoven (Holland) and Andover (EUA). Fluent English and Spanish languages, basic French and German (A1) and Portuguese native.

I have been working with SAP since 1998 going throughout all kinds of projects like: global and local implementations, local, international and global rollouts with local and global templates, enhancements/error resolution and small projects, all layers integration, go live, post go live support/hypercare and AMS/HelpDesk Clusters.

Experienced in Business transformation and information technology in all industry segments including Business Processes, SAP Advisory and value engineering with SAP FI module working as consultant, business partner, integration/stream lead and project management.

Due to the international projects I had contact and experience with American countries (Canada, United States, El Salvador, Mexico, Argentina, Venezuela, Colombia and Bolivia) – projects: Schindler, AES, Vesper, European Countries during Philips project (Holland, Portugal, Spain, Scandinavian Countries, Paris, German, Swiss, Romain, Hungary, Greece) and Angola, for Sonangol.

BRIEFING OF EXPERIENCES

- **SAP Concur** [*last role*] – Responsible to activate SuzanoPackaging Concur in Suzano's environment: focal point for the key user, travel agency, SAP Concur consultants, IT Team, gathering information, managing non-submitted expenses, communication, users set-up, configuration checks, tests, UAT support, hypercare.
- **Finance Business Consultant** – Present the Global Core Model Template during Workshops sessions, gathering gaps, doubts, risks, issues possible errors and presenting the solution after alignment with the involved ones for each subject, implementing the SAP Core Model Business Process for 2 USA Companies Code and 2 Canadian Companies Codes related to Accounting, Taxes and Controlling Streams, activating Concur and Workday – Payroll events integration to SAP S4 HANA and configuration process/procedure.
- **FI Business Partner** – Requirements understanding, acting together with the consultant as my peer, Consulting documents approvals: – specifications, tests evidences, authorization profile, ADO Cards, etc. – create workplan for module activities and small projects/enhancements, support the user during Integrated Tests and UAT, being the facilitator between the business area and the project, project announcements and communications to the business, agenda agreements, Sharepoint and Azure experience.
- **Tax PMO** – Integrate all SAP modules to Thomson Reuters' tax calculation engine (IDT) and facilitate TDF + TaxOne – TR's addon + Tax Workstream Status Report.
- **Data Migration Manager** – Brazilian template rollout for Mexico for PP, PM, QM, MM, WM, FI, CO, SD & HCM SAP Modules. Responsible for load type definition (BODS, ABAP, LSMW, MANUAL or STANDARD), follow up for loading programs development and unit tests, user support related to data extraction, volume definition and 1st integrated test cycle: activities chaining, configurations, predecessor tasks, "link" to integrated tests scenarios, data load execution definition, teams management during the loads ("Virtual War Room"), "Check point" among SAP Modules, Data Migration Status Report.
- Implementations, local and international rollouts, go-live, enhancements, merges, post go-live support, business Consulting, SAP FI Consulting;
- **Assessment**, Fit/Gap analysis, solutions and workarounds, Business Blue Print (BBP) – "As is" and "To be" models design;
- **Functional specifications** for inbound and outbound interfaces, data loads, idocs, reports and enhancements;

- Unit, Integrated and Regression **Tests**: planning, execution, documentation and gap/errors follow up;
- Process **adherence analysis** and discussion, current process adjustments;
- **Documentation**: errors evidences, tests, solutions, status report, as is, to be, gaps meeting minutes, etc);
- Understanding of other functional modules (SD, MM, PS and junior consultant for SD, MM and PP SAP Modules);
- Strong **integration** with other teams (SAP functionals SD, MM, PP, PM, PS, PLM, CO, BCS, HR, Abapers, BW, Idocs, Netweaver and Basis) and peers: consultings, vendors, customers, contractor consultants and Business Areas
- **Data Colletion**, Workshops, Configurations, Data Migration, PMO, Translation;
- **Change Management**;
- **Training** (planning, user guide and classes) and on site user support;
- Role as **facilitator** in all levels between *Business* and *System*, integrating Corp x Branch, Operational x Board, Project x Vendors and Consulting Co: SAP, Oracle, TIBCO, Thomson Reuters;
- **AMS Coordinator** from customer – understanding of processes, procedures, interfaces, errors, communication to support team, user test support, test evidence documentation, all involved integration;
- Managing and treating **GAPS** (definition, analysis, solution and implementation);
- Communication to SAP via **OSS**;
- **SAP notes** identification and application follow up;
- **Authorisation profiles**;
- **Processes redesign**;
- Current **enhancement** adjustments and new enhancements development;
- Management of **expectation**, scope, workschedule, attention points, team, handover, risks, travels, hiring, firing, billing control, project budget and consulting and consultants analysis as supplier;
- Vendor Discussions: initial meetings, scope explanation, resources definition and planning, deadlines, SLAs, delivery priorisations;
- **Cutovers** and assessments experience;
- **Workplan** creation, measurement, reports/dashboards and metrics: pre-project, day by day, new environment, loads, cutover, phase 2/enhancements;
- Create **Timeline**/Work schedule in both Excel and Microsoft Project, identifying duration, team, previous and next activities;
- **Scope** discussion, analysis and management;
- Risks, Gaps, Contingencies and Solution Analysis;
- **Status Report**: creation and presentation according to the local template or Canvás model and shows “Where we are”, “AS-IS”, “Activities on going”, “next step”, Project Progress, gaps, problem and solutions, risks and contingencies, information of accomplishments and action plan. Green, Yellow and Red sign. Dates, Responsibles, gaps and solutions, risks and mitigations. Own or customer’s methodology.
- Budget Management; Billing and Expenses Analysis; Contracts, Deals, Rate discussions;
- Drive **improvements**;
- Governance; Raise Communication Plan, Training Plans, Cutover activities; Change Management experience;
- **Leadership** in meeting – all levels;
- **SLM** – Service Level Manager: defining call prioritisation, following the ones on going, solving the late ones, integrating users and business owners, discussing time, execution deadlines date and costs for each call, enhancements and small projects.
- Knowledge of **tools** like Sharepoint, Lotus Notes e Solution Manager for documentation repository, authorisation profile and transport request procedure and Atlassian Jira Cards, Zephyr Scale, Azzure, DMS Files.
- **Remote Management**: use of communication tools (Teams, Sametime e Communicator), periodically meetings and strong agenda management. Work Team of 10 people among consultants, customers and board team plus stakeholders and another with 25 people among consultants, foreigners and stakeholders, assigning roles, activities, deadlines and prioritisation.
- Strong software implementation **methodology** knowledge: ASAP, Activate, SCRUM, AGILE.

EXPERIENCES (last 10 years)

SUZANO – SUZANOPACKAGING – – Brazilian – American Pump & Paper

Working 100% remotely from Brazil to bring SuzanoPackaging Concur into Suzano's environment. Packaging is an American Company bought by Suzano and it was necessary to bring them into the Buyer Company Infrastructure. I coordinate the Brazilian SAP Concur consultants for both Travel and Expenses for 2 Co.Codes under one Organisation Unit, contact to the American TMS (Altour), focal point to gather the chart of accounts and cost centres as well to align Packaging's Expenses types to Suzano's and assign the GL account to each of them. Integrated Test & UAT. Treatment of the users: listing them, gather all information: Employee ID, cost centre, Manager, address, Co.Code, email, UPN, etc, Users Loading via 305 and 350 file, manual creation, User Permissions, Travel Policy determination, Plan & execute Communication about Concur transition (termination of old credit card and old Concur, new credit card and bank information, submission of open expenses, America Travel Policy distribution, Q&A, credentials, go-live, etc.), some configuration adjustments (**List Management**): cost centers, ToE limits, etc., **Import/Extract Monitor** for Extract AP File & User Upload, work with Bank of America to integrate the new credit card and Process Design/Redesign. Key user support as User Administrator role for both Travel and Expense. Dealing the Concur Daily meeting.

LDC – LOUIS DREYFUSS COMPANY – French AgroBusiness

Working 100% remotely from Brazil and dealing with time zones from China to Canada for the BOLD Program (Back Office Louis Dreyfuss) I was responsible to roll Concur and Workday integration out in 4 different American projects dealing with Data Integration Team, Partner Apps Team, MDM Team and all other SAP Module that integrates with the entire Accounting, Tax & Control solution. Tasks were logged into Jira Cards as SolMan RFCs and the ticket evolution. On the other hand I could be assigned to FIN Cards in order or to configure or to provide a solution. In parallel I presented the CORE MODEL solution during remote workshops, logged important point as issues, information, doubts, next actions, risks, change management needs, etc and during the "BUILD PHASE" all points should have been discussed and solved. Besides Business Consultant I also act as "DT&A" – Data Transformation & Analysis which I worked with CSD file, raised RFCs in SolMan, configured, tested then got into weekly SCRUM Meetings to move to Production. Every move deeply documented, including "Urgent Changes" that follow the same procedure with much more speed way – many times moved to PRD on the same day.

Important to highlight that some American process asked for any CORE MODEL changes – for that, DAB meetings were provided for the CORE TEAM in EUROPE with ppt presentation containing the current CORE MODEL solution, the change proposal and process, configuration, development impacts. I was responsible to weekly present the configuration stage, gaps logged, errors follow up as been the facilitator to provide meetings with all the involved ones – that could be local meetings (in the US time zone) or involving other time-zones as with the Bulgarian Team, or French Team or China Team. For ATC, I was responsible for the unit test (with evidences), integrated test (with evidences), raise the scenarios – including E2E and specific data, built both IT and UAT scenarios and create them in Zephyr Scaler app in Jira. Meanwhile, I worked with all communications and follow up with Concur Team (in Sofia and in Kansas) for mappings and conversations to get the integration via API done and the support to the Local HR Business Team for Workday to have the payroll payment cycle file

ready to automatically integrates in S4. Concur set up and Workday Chart of Account and Type of Expenses mapping were part of my work. As user profile discussions.

I worked for BOLD (projects: YORKTON2, YORKTON3, OHIO, PLANT PROTEINS) and EAGLE Templates (CLAYPOOL).

NUTRIEN – Canadian AgroBusiness

Brazilian Local R2R-BP for ELEVATE PROJECT working as GL, AR and PS facilitator during OTD, DTC and M2S' UATs.

BRIDGESTONE & TWW – Chinese Automotive Company

Working as the local Accounts Receivable Consultant for EVEREST PROJECT – BRAZIL Rollout focusing on bank exchange information involving Nexxera, CPI, REVAL and Santander, txt, xml & JSON files formats, and CNAB 240 & MT 940 layouts. Collection and Boletos. Else, clear legacy boleto in the new SAP S4 and Treadnet Interface – open and closed customer itens. Payment Conditions analysis and improvements – customer specific, FIORI TCodes, Helped with credit analysis, limits, score, request, verification, dispute and exposure, strongly integrated with TM and SD: Orders, Deliveries, Billings and Transportation. Bad Debits discussions, Local and Global Business Support for EVEREST. Use of ADO – Azzure DevOps.

NUTRIEN – American Agricultural Company

I joined to finish some solutions (HR Interface and own credit card), to help the integrated test and support the go-live.

SANOFI – French Pharma Company

Working as Tax Integrator PMO in order to get together Thomson Reuter Tax Calculator Engine (IDT) together with SAP and TR's addon TAXONE to standard SAP TDF + CIAP for iShift program. Agile Methodology controlling in Jira the Actions, Epics, User Stories and Sub Tasks – Strong methodology control and extremely difficult political environment among the customer and both consulting companies. Also dealing with different time-zones from US to CET. My main role was to put the workstreams together, facilitate meetings, do and present Tax Status Report. Workstreams and People involved: O2C, Trade, P2P, P2R, SCI, Industrial, A2R, Access, Basis, Abap Factory, Migration, Cutover, all Solution Design and Business Enablement SPOCS and Program Leadship: Sanofi, Accenture & Thomson Reuters.

TUPY – Brazilian Automotive Company

Worked as Data Migration Manager from Oracle to SAP, helping defining the extraction and inbound to SAP type (manual, BODS, worksheets or LSMW)

NCR – American Finance Technology Company

Worked as Project Manager, PMO & Focal point between SAP consultants and Sponsors – Brazilian and American. Responsible for workshop and BBP agendas, Local and Global Reports analysis, Resources onboarding, build, adjust and measure workplan, status report deck and presentation, gap analysis, training plan, testing plan and communication. This project was called as "Reversal implementation" once the bought company's systems were implemented in the buying company – on the Brazilian site. More than 20 systems involved: SAP, SIEBEL, EASYWAY, SYNCHRO, ESPAIDER, NEOGRID, OSGT (Thomson Reuters- Trade – Import & Export) and FIELDS ones (FieldMap, FieldEmployee, FieldTimeLineServer, PDA Market Solution, FieldSyncServer, FieldSyncStatus, FieldMove, FieldMail, FieldMapServer, FieldMapDownpayment, FieldMinihg, FieldPonto, FieldGeo – GoogleMaps, FieldMapCon, FieldHRT, Webservices, W2C, Indicadores, Portals, Inventories, Freight, - more than 10 systems.

UNIDAS – Brazilian Rent a Car

Worked as FI Consultant on post go-live support. Focus on SAP basics, navigation, reports, filters, variants, analysis, solving doubts in general and process specifics, review processes and configuration and implement Customer Experience interface when the customer books the car on the app and on the site: posting the booking – pre or post paid, withdraw the car, final payment by check, debit/credit card or cash – all postings are automatic via interface informing the booking number in order to group all documents related to the same reservation.

SUZANO – Brazilian Cellulose & Paper Company

Worked as specific FI Consultant for Special Purpose Ledger during Suzano's Integration Project in order to incorporate Fibria, the eucalyptus' cellulose production lead Brazilian Company. I am responsible for the Profitability Special Ledger and Consolidation Special Ledger.

The hard piece of work is to "discover" what to do once there was no BBP or key-user available and I joined the project on the Build Phase.

I worked with the Abaper and the IT person in order to configure, develop user-exits, call functions and includes, tests and documentation for configuration, unit test and adjustments after integration test. Participated in the cutover and migration plan.

TMF – Dutch Professional Services

In order to get an honest view for that project and mitigate any risk for the go-live that would be in 6 months from May, I worked with Resulting IT Management for 2 weeks on an assessment focusing on: SAP design, customization, Brazilian localization, S/4 HANA benefits, integration, unit test, mass data for integration test, data migration (extract, map, upload, tool), landscape, security, proposing new governance, project chart, team/resources and timeline.

EMBRAER – Brazilian Aviation Company

I am part of the SAP Support Team for Finance. We are based in the Financial Department with 2 abapers and 1 SD, 1 MM, 1 CO and 2 FI Consultants for fixing errors, updating SAP according to the law (REINF, SPED new version for EFD and PIS), emergencial problems, enhancements up to 200h, business analysis and other projects support. I joined this team 3 months ago and I was/am responsible to create the SAP txt ISS files for Sorocaba, Gavião Peixoto, Botucatu and Campinas cities. Each one has its own layout and for each case there was the specific Functional Specification, Effort Estimation, Abap integration, Unit Test and UAT support. Design of withholding tax accounting/tax report. For other projects I developed, explained and created validation rules, searched for specific Tax SAP notes and participated in Brainstorms for SPEDs' errors.

FREUDENBERG PERFORMANCE MATERIALS – German Shipping Company

Punctual activity to apply the "Boleto in House" as soon as the Nota Fiscal is validated by the government (SEFAZ) and issued to be sent together with the truck driver. Use of the standard SAP features for boleto together with a local development to print the slip.

MERCOSUL LINE – CMA-CGM – French Shipping Company

Responsible for the Brazilian Data Collection for FI and MM and Focal point for France and India for the configuration, Brazilian discussions and localization. Data collection done via workshops for processes discussion and SAP analysis and final solution. As migration responsible for FI Data Migration I wrote all Functional Documentation for FI Data Migration via IDocs: AP Open Items, AR/FI-CA Open Items, GL Open Items and GL Balances and aligned with strong integration to Manilla Team who were responsible for the built, tests and loads. I helped Brazilian Business to link local process to the Global Template and to understand the "to-be" within the Global Template applied locally.

JCB DO BRASIL – English Automotive Company for Build, Assembly and Fabrication Machines and Equipments

I was based in Brazil (Sorocaba) but part of the Global UK SAP Team. Unique SAP Consultant for Brazil primary responsible only for FI helpdesk calls and errors identification from other SAP modules to be reported to UK ended up dealing with all SAP modules or by solving the errors throughout configuration or dealing with the AMS Consulting Company. To report the errors to the AMS, to UK or when solving SAP problems I was responsible for AS IS documentation, TO BE documentation, business analysis and process understanding. I had both roles: functional consultant and manager for the department – when dealing with the bureaucratic procedures with Consulting Companies or project manager when dealing with Business expectation and delivering calls solved and enhancements/reports. Worked in a Cross Matrix related to reports: My manager was from UK, I followed UK process, procedures and objectives and had a Brazilian sponsor who demands tasks directly.

I was involved in all JCB do Brasil's Department as Aftersales, Services, Sales, Purchase, Supply Chain, Production, Quality, Finance, Controlling, Tax and IT, in order to understand the business, try to solve some configurations and report to UK or to AMS any type of problem.

I dealt with Consulting Company for AMS taking care of payments, baseline control, on site resources, budget, contract and calls and with other Consulting Company for projects/enhancements as, FIORI, DRAWBACK, Block K, SPED Contribuições/PIS, FCI, RECOF, MVA, MIGO/MIRO Automatization and Budget Rate Report.

Also interviewed consultants for local help together with UK.

PDG – Brazilian Company for Construction and Incorporation in the Real Estate Market

SAP Support Manager participating in the transition between the AMS support companies: ticket's budget approvals, tickets prioritization, due tickets investigation/cleansing (to be closed, to be reverted, to proceed to PRD or to be redefined). Intermediated the handover between the current AMS consulting to the new AMS consulting explaining how the tickets worked, the process, procedures, change management, looking for users for ticket validation and send transport orders to PRD.

VOTORANTIM METAIS –Brazilian Metal Production (Nickel, Aluminium, Zinc) Company

Management of Sales implementation in branch CBA Sorocaba involving modules SD and MM and support of PP, PS, AA and FI-CO. SolMan for approval and test evidences documentation.

FRESENIUS NETCARE – German Dialysis Equipments Company

Focal point for German and India relationship related to the gaps solution documentation: functional specifications, talking to Abap Factory in India for explanations, local workplan schedule and merge with global workplan, Status report meetings, unit tests documentation, configuration and tests documentation, Sharepoint and Solution Manager for all document types: meeting minutes, as-is and to-be, gaps, tests evidences, specs, business processes and general documentation as bank communication, legacy, etc.

SONANGOL – Sociedade Nacional de Combustíveis de Angola

Enhancement: For branch "Logística", SAP modules FI, CO, FM, AA, PM, MM, SD e ABAP
Roll out: SAP FI-FM module for 11 branches and support for the others 8 branches already implemented including the budget load for the next fiscal year. Also responsible for project Roll out "Pagamento Centralizado" (Centralized Payment) for 15 branches and support for the others 4 branches already implemented.
