

Alessandro Miguel Lasalvia

ERP SAP S/4HANA SD specialist | SAP Sales Order Processing| Order-to-Cash (OTC) Optimisation| Pricing and Billing Configuration

Address: London, England, United Kingdom

LinkedIn: <https://www.linkedin.com/in/alessandro-miguel-lasalvia-86359021/>

- Expert in SAP ERP Implementation / Specialist in SAP SD Module and Order to Cash Process
- Accomplished ERP professional with over a decade of experience in SAP ERP and Oracle ERP projects. Specialising in the SAP SD module and the entire Order to Cash process, I excel in optimising workflows, enhancing customer satisfaction, and streamlining supply chain operations. Proficient in analysing complex business requirements, designing tailored solutions, and leading cross-functional teams to deliver measurable results.
- With proven expertise in managing end-to-end SAP SD implementations and solving challenging issues, I am passionate about continuous learning and innovation. Dedicated to leveraging ERP systems to achieve operational excellence and sustainable business success, I thrive in collaborative environments that drive tangible value.

EXPERIENCE

Modis, London

April 2021 - Present

Specialist - SAP S/4 Hana SD/MM

- www.modis.com/ ERP SAP S/4HANA SD Implementation & Rollout: Led seamless integration and configuration, ensuring alignment with business processes.
Pricing & Data Management: Automated price list loading with high accuracy across regions, improving data consistency and efficiency.
Process Optimization: Implemented global pricing architecture and contracting manuals, enhancing compliance and operational performance.
System Analysis & Support: Conducted end-to-end validation of SD/MM functionalities, ensuring system reliability and performance.
Change Management: Managed SAP SD updates, adapting solutions to evolving business needs.
Incident Reduction: Deployed post-implementation AMS (Ticket Service), cutting incidents by 75% for multiple clients.
Key Achievements:
 - ✓ Developed an IDoc interface between external systems for transport cost management, customized via SAP AIF (/AIF/CUST), reducing process time by 80% at Procensus.
 - ✓ Automated work manuals, streamlining documentation and improving user adoption.

Integer Consulting, Lisbon

July 2019 - March 2021

Specialist - SAP S/4 Hana SD/MM

- www.integerconsulting.pt/ • Provided ticket service (AMS) and support for various companies, reducing incidents by 95%, managing a queue of over 400 incidents. • Monitored Supply Chain processes, focusing on pricing, promotion, sales negotiation, company structure, and master data. • Conducted tests on SAP S/4Hana ERP systems, identified problems, and implemented solutions to maintain system integrity. • Developed functional specifications based on identified issues within client companies, ensuring alignment with business requirements. • Configured and customised SAP S/4 Hana ERP solutions to meet the specific needs and workflows of each client company. • Ensured timely and successful implementation of updates to the SAP S/4 Hana ERP system, keeping it current and optimised. • Assisted in addressing sales and tax-related issues, providing customer service support, including merchandise shipping, pricing, billing processes, and order-to-cash (OTC) concerns. • Played a key role in warehouse integration and provided SAP training to stakeholders and end-users as needed. • Performed additional functions compatible with the role, as required by the project leadership team. Main Achievements: • Led customer service initiatives for various clients at Deloitte Portugal, resulting in a remarkable 95% reduction in incidents, addressing a backlog of over 400 incidents in the queue.

GSW Software, São José dos Campos

3 years 6 months

Specialist - SAP S/4 Hana SD/MM

February 2018 - June 2019

- www.gsw.com.br/ • Provided Ticket Service (AMS) and comprehensive support for various client companies, successfully eliminating 100% of incidents and ensuring seamless ERP system operation. • Conducted in-depth analysis of company

requirements for new projects, determining how SAP SD ERP solutions could best meet specific needs. • Implemented and customised SAP SD ERP solutions tailored to each client, ensuring alignment with their unique business processes. • Managed new tax demands and ensured the timely update of SAP SD ERP solutions by company requirements. • Developed and executed functional specifications to guide the implementation of new projects and system enhancements. • Conducted interface analysis with other systems, including Synchro and MasterSaf, to ensure seamless integration and data synchronisation. Main Achievements Modine Company: • Implemented NFe (Nota Fiscal Eletrônica) and redesigned the Brazilian Tax Request Layout, leading to process automation and a 40% reduction in manual workload. Grupo Antolim: • Implemented NFe and adapted the system to the new Brazilian Tax Request Layout, resulting in a 40% increase in productivity through the redesign of sales scenarios. • Configured new interfaces with the MasterSaf system to enhance data flow and integration efficiency.

Specialist - SAP SD/MM

January 2016 - April 2016

- www.gsw.com.br/ • Conducted in-depth analysis of company requirements for ERP project, collaborating with stakeholders to understand business objectives. • Configured and customised SAP SD ERP solution to meet project specifications, working closely with development teams for optimal system performance. • Led efforts to seamlessly integrate SAP SD ERP solution with other company systems and applications. • Conducted extensive testing to validate the accuracy and efficiency of integrated systems. • Provided ongoing support post-implementation, addressing issues and ensuring system stability. • Conducted regular checks and maintenance activities to optimise SAP SD ERP solution performance. Main Achievements: • Implemented and customised ERP SAP SD for TIVIT client. • Integrated ERP solution with MasterSaf system for Obligations Tax Accessories. • Achieved 100% compliance with government tax requirements at State and Federal levels. • Ensured seamless data exchange, enhancing overall efficiency and accuracy in financial processes.

Softtek, Brazil

February 2017 - January 2018

Specialist - SAP S/4 Hana SD

- www.softtek.com/ • Analysed business needs and configured the system (SAP S/4 Hana - SD) to optimise operational efficiency. • Coordinated data collection with Key Business Users (KBU) for all objects related to Order to Cash (OTC) process areas. • Conducted in-depth analysis of various business scenarios, focusing on Sales and Billing Order processes and associated taxes (J_1BTXSDC and J1BTAX). • Defined and configured Business Partner (BP), Business Partner Category, and Business Partner Roles to streamline business operations. • Implemented SAP FSCM - Credit Management to enhance financial control and minimize credit risks. • Collaborated with development teams and other departments to seamlessly integrate the SAP S/4 Hana SD system with other technological solutions. • Configured and customised SAP S/4 Hana SD solution with FIORI, aligning it with the specific needs of the company. • Executed material master data configuration using MM01 for effective inventory management. • Interacted with other company systems and applications to ensure seamless data flow and integration. • Utilised Mass Load (LTMC) for SAP S/4 Hana - SD to facilitate efficient data migration and updates. • Automated processes through the creation of manuals, enhancing overall system efficiency. • Conducted training sessions for users to familiarise them with the SAP S/4 Hana - SD solution and its functionalities. • Prepared and delivered comprehensive configuration documentation for all tasks performed in SAP S/4 Hana - SD. Main Achievements: • Led the first implementation of SAP S/4 Hana with FIORI (Apps) in Brazil for Marilan Alimentos S/A. • Redesigned and integrated 1039 business processes across all SAP ERP modules, resulting in a 20% reduction in technology costs (Featured in SAP company success story).

Essence IT, São Paulo e Região

May 2016 - January 2017

Specialist - SAP SD/MM

- essenceit.com/ • Conducted thorough analysis of diverse company requirements, estimating budgets for ERP implementations. • Served as the primary point of contact for resolving customer issues and collaborated effectively with external teams. • Managed and resolved approximately 250 Problem Tickets per month related to SAP SD and Taxes, achieving an 87% reduction in incidents. • Conducted comprehensive system tests to ensure software quality, identifying and addressing potential problems before the implementation of new projects. • Provided extensive training to users, ensuring their readiness and proficiency in using SAP SD. • Offered post-implementation support, ensuring the SAP SD solution's correct functionality. • Stayed abreast of trends and new developments in the SAP SD area, consistently proposing solutions for process improvements. • Kept up to date with the latest best practices and news in the SAP SD field. Main Achievements: • Implemented Nfe 4.0 (New Layout) and XML to comply with changes from the Brazilian Tax Authorities, impacting and enhancing the solution for 15 clients.

Walar IT Business, São Paulo e Região

April 2014 - December 2015

Oracle Application Specialist - OTC

- www.walar.com.br • Conducted thorough analysis of customer needs and requirements, translating them into tailored solutions within Oracle EBS ERP. • Successfully implemented solutions in Oracle EBS ERP (OTC) aligned with customer specifications, ensuring seamless Order-to-Cash (OTC) processes. • Executed customisations within Oracle EBS ERP (OTC) to

address unique customer requirements, enhancing the system's adaptability. • Provided continuous support to end-users, addressing technical issues and system usage queries, resulting in an 80% reduction in incidents with error status. • Orchestrated the integration of Oracle EBS ERP with other information systems (e.g., MasterSaf) and relevant applications, optimising process automation. • Conducted comprehensive training sessions for end-users of Oracle EBS ERP (OTC) to ensure efficient system utilisation and enhance user proficiency. • Meticulously documented implemented and customised solutions within Oracle EBS ERP for future reference, contributing to business continuity and knowledge retention.

KYOCERA Document Solutions Europe, Barueri

October 2013 - March 2014

Oracle Application Specialist - OTC

- www.brazil.kyocera.com/ • Employed advanced analytical skills to understand, analyse, and optimise legal suits existing in Oracle EBS, ensuring increased efficiency. • Implemented solutions on Oracle EBS (OTC) aligned with tax and accounting requirements, contributing to streamlined operations. • Conducted tailored customisations in Oracle EBS to align the system with specific business needs, enhancing overall functionality. • Delivered comprehensive training sessions to end-users on Oracle EBS (OTC), ensuring proficiency and maximizing the system's utilisation. • Thoroughly documented implemented and customised solutions to ensure business continuity and serve as a valuable reference for future initiatives. Main Achievements: • Initiated remote functional support in June 2010, addressing sales and billing process issues, resulting in a remarkable 95% reduction in incidents with pending status. • Transitioned to full-time implementation projects in October 2013, contributing to the successful execution of new projects.

Stefanini Brasil, São Paulo e Região

March 2011 - September 2013

Oracle Application Specialist - OTC

- www.stefanini.com/ • Applied business analytics for customer needs translation into personalised Oracle EBS ERP solutions. • Implemented Oracle EBS ERP (OTC) solutions adhering to AR/Billing and NF-e module requirements. • Executed customisation of Oracle EBS ERP, providing functional and technical support, issue resolution, and preventive updates. • Delivered ongoing maintenance support for Oracle EBS ERP, ensuring system stability and addressing functional and technical issues. • Conducted end-user training sessions to optimise system efficiency and documented solutions for future reference. • Maintained detailed documentation of implemented Oracle EBS ERP solutions for audit and reference purposes. • Collaborated with cross-functional teams to gather and analyse business requirements, ensuring ERP alignment. • Proactively identified opportunities for system improvement, contributing to the continuous enhancement of Oracle EBS ERP.

Bertini do Brasil, São Paulo

December 2010 - February 2011

Oracle Application Specialist - OTC

- www.bertini.com.br • Analysed customer needs and translated them into personalised solutions within Oracle EBS (OTC) ERP in version R12. • Implemented Oracle EBS ERP solutions based on customer requirements, focusing on Order Management (OM), Accounts Receivable (AR), and Billing modules. • Conducted customisations in Oracle EBS ERP (OTC) to meet unique customer process requirements, particularly in Accounts Receivable (AR) and Order Management (OM). • Provided functional and technical support for Oracle EBS ERP, addressing and correcting issues promptly to ensure smooth business operations. • Executed updates and preventive maintenance activities to enhance the stability and efficiency of the Oracle EBS ERP system. • Delivered comprehensive training sessions to end-users of Oracle EBS (OTC) ERP, ensuring efficient system utilisation and optimising user proficiency. Main Achievements: • Implemented Order Management (OM), Accounts Receivable (AR), and Billing modules for Magazine Luiza within the R12 version of Oracle EBS ERP (OTC). • Configured scenario types and tax categories to align the ERP system with specific business needs, contributing to improved operational efficiency.
