SUMMARY

I am exclusively seeking contract-based opportunities (Pessoa Jurídica - PJ arrangements).

I am based in Italy and hold a valid Partita IVA.

EXPERIENCE

IT BUSINESS ANALYST

Nestle Brasil Ltda. São Paulo | Jul 2021 - Jul 2023

Implementation and enhancement of IT Master Data solutions. Translation of technical requirements into functional specifications to meet business needs. Participation in projects involving the implementation of new solutions, reorganization, and mergers & acquisitions. Collaboration with regional teams in shared service centers. Adoption and adaptation of IT change management practices using the ServiceNow platform and process improvement methodologies. Interaction with offshore teams for incident resolution/reduction and the upload/download of massive data sets. Served as Project Manager to disseminate agile practices across product and technology teams, acting as a facilitator and process mentor for these areas.

BUSINESS ANALYST

Unilever Brasil Ltda. São Paulo | May 2014 - Jul 2021

Analyst (2015 - 2018): Business Intelligence Transformation & Modeling

Transformed and modeled data for clients, suppliers, finance, and materials using SAP ECC for data recording, and LSMW, Data Manager, and Import Manager for mass data loads.

Improved and automated processes primarily using Microsoft applications such as Power BI, Power Apps, Excel VBA, SharePoint, Power Automate (Flow), and Teams.

Created and delivered managerial KPI presentations covering the entire Master Data scope.

Auditor (2019 - 2020): Compliance & Controls (Internal Audit)

Gained over two years of hands-on experience and knowledge in COSO ERM (2013 & 2017), ISO 31000, and Sarbanes-Oxley (SOX) compliance frameworks.

Conducted analyses and performed control testing against both internal policies and external regulatory requirements.

Project Management (2020 - 2021): Global Customer Master Data Implementation for Latin America

Supported all phases of the implementation project, including testing, training, and documentation.

Mapped data governance processes, defined standards, and established governance frameworks for customer data management.

Acted as a liaison between stakeholders, MDM teams, and global teams to gather functional requirements, ensure alignment on master data rules, and analyze and evaluate business scenarios.
