

Achiles Freire Soares

Lauro de Freitas, Ba, Brasil

Summary

I am a senior developer with 30 years of experience and remarkable projects in the biggest Brazilian companies (Petrobras, Usiminas, Suzano, and Brahma/Ambev). Always participating in all steps of the development cycle (specification, analysis, design, development and implementation). I have led several development squads (for 12 years). I highlight my experience in .Net (C# 20 years), SQL Server (25 years) Development of micro services (9 years), legacy technologies (20 years).

Skills

.Net C#,VB.Net, Java, Delphi, C, C++, Visual Basic, SQL Server, Oracle, Xamarin/Maui, AWS, Azure, GCP, CSS, HTML, JavaScript, JQuery, Jira, Agile, Kanban, Asp.Net MVC, Visual Basic, Asp.Net Classic, RabbitMQ, SQS,

Education

Aug/1992 – Dec/1996 - Bachelor's Degree in Computer Science from UCSal, Brasil, Bahia

Jan/2022 – Dec/2005 Administration with emphasis on information systems management

Professional Experiences

AFS Tec (Start Jul/2024 until now)

Position: Senior Full stack Developer

Responsibilities:

- Development in legacy projects
- Jira
- Agile Processes
- Requirements Gathering
- Analysis Systems Modeling
- DevOps

Technologies: Visual Studio 2022 – C#, JQuery, Bootstrap, Vue.js, Microsoft Entity, Net Core (3.0 – 7.0), Docker, GCP, SQS, RabbitMQ

T-Systems (Start Mai/2023 End: Jun/2024)

Position: Senior Developer/Tech Lead

Responsibilities:

- Deeper understanding of the backlog to facilitate refinement ceremonies
- Team reference for technical issues
- Reference for business rules implementation
- Systems Specification
- Requirements Gathering
- Systems Modeling Analysis
- Code Review to ensure best development practices
- Team management, observing strengths and weaknesses

- Detecting motivational and demotivating factors
- Work as a senior developer with the team

Technologies: Microsoft Visual Studio 2022 – C#, Microsoft Entity, .Net Core (3.0 – 7.0), Docker Images, Kanban, Configuration and publishing Micro services, Windows Forms, Java, C/C++, Oracle, Micro services, Jira, Agile Processes

Invillia (Start Sep/2020 End Jan/2023)

Senior Developer

Responsibilities:

- Back-end Development in several projects
- Team reference for technical issues
- Reference for business rules implementation
- Code Review to ensure best development practices
- Team management, observing strengths and weaknesses
- Detecting motivational and demotivating factors

Technologies: React, Java, Spring Boot, JPA, Design Patterns, Kafka, PostgreSQL, MongoDB, IntelliJ, Micro Services, Jira, Agile Processes

Senai CIMATEC (Start Nov/2019 End Aug/2020)

Clients: Petrobras, Vale, CHESF

Tech Lead

- Systems Specification
- Requirements Gathering
- Systems Modeling Analysis
- Team reference for technical issues
- Reference for business rules implementation
- Code Review to ensure best development practices
- Team management, observing strengths and weaknesses
- Detecting motivational and demotivating factors
- Work as a senior developer with the team
- Development
- Jira
- Agile Processes

Technologies: ASP.NET MVC 5, C#, .NET Core 3, Angular, Microsoft Entity, SQL Server, MongoDB, Rabbit MQ

Client Lucas Solutions (Start Jan/2010 End Oct/2019)

Responsibilities:

- Analysis
- Project
- Development
- Technical support

Technologies: Visual Studio 2010-2019, Delphi, Kafka, SQL Server, .Net Framework (2 – 4.6), .Net Core 3, DICOM, PACS

Client: AKTD (Start Oct /2019 Jan/2021)

Position: Developer

Responsibilities:

- Specification
- Analysis
- Project
- Development

Technologies: Visual Studio 2019, Xamarin Forms, Delphi, iOS, Android, Mobile, SQL Server, SQLite, .Net Core 3.1

Client: AppOne (Start Jan/2019/Oct 2021)

Position: Developer

Responsibilities

- Specification
- Analysis
- Project
- Development

Technologies: Visual Studio 2019, Delphi, iOS, Android, Mobile, Xamarin Forms, SQL Server, SQLite, .Net Core 3.1, Jira, Agile Processes

Client: HS Export

Position: Developer

Responsibilities

- CRM software for an importer and exporter located in California but with service throughout the United States
- Specification
- Analysis
- Project
- Development

Technologies: Visual Studio 2019, Delphi, iOS, Android, Mobile, Xamarin Forms, SQL Server, SQLite, .Net Core 3.1

Client: ProgenBR

Position: Developer

Responsibilities

- Electronic Quotation Portal: Back-end Portal for electronic quotation of products, goods and services
- Development
- Tech Support

Technologies: PHP, PostgreSQL SQL, Jira, Agile Processes

Client: Editora Elfez

Position: Developer

Responsibilities

- Development of Soibelman Encyclopedia, Electronic version of a well-known legal encyclopedia
- Analysis

- Project
- Development

Technologies: Delphi 2006, Microsoft ASP. Net Forms, Paradox, Delphi, iOS, Android, Mobile,

Client: MGB Informatica (Start Jun 2008 End Dec 2012)

Position: Developer

What I did:

- Development of First spell checker fully adapted to the new orthographic agreement, compatible with OpenOffice and MS Word
- Project
- Development

Technologies: Delphi 5/2006, Visual Studio C++, Java, MFC, iOS, Android, Mobile,

Client: LexOnline (Start Mai 2007 End Dec 2011)

Position: Developer

Responsibilities

- Development of Dictionary for consulting all the laws of the country, from the first imperial decrees to the most recent laws
- Specification
- Analysis
- Project
- Development

Technologies: Delphi 2006, Paradox, iOS, Android, Mobile,

Client: MGB Informatica (Start Jun 2008 End Dec 2012)

Position: Developer

Responsibilities

- Tech Suport and Bug correction of a Well-known music software

Technologies: Delphi, Mobile, iOS, Android

Client: Editora Lexikon (Start Aug/2011End Dec 2012)

Position: Developer

Responsibilities

- Development of Electronic version of the country's first dictionary

Technologies: Delphi, Mobile, iOS, Android

Client: AfBNDES (Start Jan/2010 End Dec 2011)

Position: Developer

Responsibilities

- Development of Benefits control portal of the BNDES Beneficiaries Association
- Specification
- Analysis
- Project
- Development

Technologies: Visual Studio 2010, Microsoft ASP. Net Forms, SQL Server, Paradox (legacy database), Delphi 2006, Mobile, iOS, Android

Client: Suzano (Start Jan/ 2001End Jul 2007)

Position: Developer

Responsibilities

- Responsible for the project of Strategic Indicators System (Balanced Scorecard Methodology,
- Specification
- Analysis
- Design
- Development
- Implementation (2 large companies, 2 medium-sized companies)
- Training (46 classes)

Technologies: Visual Basic 5.0, Visual Studio 2003, SQL Server, Oracle, MySQL, Asp

Client: **Suzano** (Start Jan/2005 End Dec 2007)

Position: Developer, Tech Lead

Responsibilities

- Development of two systems for production planning, as well as quality control based on detailed specifications based on customer orders
- Systems Specification
- Requirements Gathering
- Systems Modeling Analysis
- Team reference for technical issues
- Reference for business rules implementation
- Code Review to ensure best development practices
- Team management, observing strengths and weaknesses
- Detecting motivational and demotivating factors
- Work as a senior developer with the team
- Development

Technologies: Visual Studio 2003 – C#, SQL Server

Client: **Suzano** (Start Jan/2005 End Dec 2007)

Position: Developer

Responsibilities

- Internal Customer Assessment System
- A project implemented at Suzano Pulp and Paper, where all areas are assessed based on the consumption of products/services, It is an innovative project that was even positively cited in the respected publication EXAME
- Specification
- Analysis
- Design
- Development
- Tech Support

Technologies: Visual Basic 5.0, SQL Server, Oracle, MySQL

Client: **Suzano** (Start Jan/2005 End Dec 2007)

Position: Developer

Responsibilities

- System for controlling calibration records and verification of industrial instruments, full of specific rules for each instrument model

- Systems Specification
- Requirements Gathering
- Systems Modeling Analysis
- Team reference for technical issues
- Reference for business rules implementation
- Code Review to ensure best development practices
- Team management, observing strengths and weaknesses
- Detecting motivational and demotivating factors
- Work as a senior developer with the team

Technologies: Visual Basic 5.0, SQL Server, Java Server Pages,

Client: M&FF Systems (Start Sep/1997 End Dec 2000)

Position: Developer

Responsibilities

- Specification
- Analysis and design of systems for the industrial maintenance area, in the largest companies in the country (USIMINAS, CST, Brahma, Petrobras)
- In addition to training and technical support.

Technologies: Visual Basic 5.0, Visual Basic 6.0, Crystal Reports, SQL Server, Sybase, Oracle, Erwin (case tool), Sybase Power Designer (case tool)

Client: Plandados (Start Jan 1996 End Set 1997)

Position: Developer

Responsibilities

- Development Electronic Documentation Systems (ISO-9000), Non-Conformity Recording (ISO-9000)

Technologies: Visual Basic 4.0, Sybase, SQL Server

Client: Bardahl (Start Feb 1994 End Jan 1996)

Position: Junior Developer

Responsibilities

- Development of Set of systems (Administrative, financial, commercial, HR, accounts payable/receivable)

Technologies: Visual Basic 3.0, Access as Database, Crystal Reports

Client: Telebahia (Start 1993 End Feb 1994)

Position: Developer

Responsibilities

- Development C and C++ interfaces for sending and receiving commands to telephone exchanges

Technologies: Borland C, Visual C++
