Main Achievements in SAP Projects

• Project: **Bio-Rad Laboratories** - SAP S/4 HANA – Lagoa Santa - MG

Business sector : Chemical & Pharmaceutical

Period: Jun/2025 – Current job

Consulting : K2 Partnering – México CV

Role: Specialist Consultant WM / Manufacturing & Logistics

Responsible for reviewing and finalizing the WM configuration and integrating it with the MM, PP, QM, and SD modules, ensuring the correct operation of in bound and out bound raw materials, packaging, and finished products purchased and produced locally, as well as imports and inter -plant transfers between Bio -Rad plants and its logistics operator located in Extrema, Minas Gerais , using STO's and Deliveries made in SAP. Direct contact with the global SAP implementation teams at Bio -Rad USA, ensuring the unification and standardization of common processes across the group's companies, respecting the rollout defined by headquarters.

Coordination and support in executing validation tests performed by SMEs, training, and documentation of all new configurations and improvements made to the system. Guaranteed execution of receiving processes via RF collector and barcode labels, enabling full control of received and produced batches, ensuring the movement of materials and finished products according to their expiration dates, and maintaining the entire chain of traceability between production, quality assurance, storage, and sales.

Project executed in Lagoa Santa, Minas Gerais.

• **Project: Tremco Viapol** - SAP S/4 HANA 2021

Business sector : Construction Products & Building Materials

Period: Dez/2022 – Jun/2025

Consulting : Tremco Viapol (employee)

Role: Specialist Consultant MM & WM / eWM

Responsible for SCM & IM WM and PUR roles and during the migration from SAP S/4 HANA 1809 to SAP S/4

HANA 2021 version in four Brazilian plants.

Maintenance and new implementations in Viapol Ltd. MM and WM / eWM modules, working in a multifunctional team with SAP service for Latam .

Support for supplies, logistics, quality, controlling and legal taxes areas , including contacts with software supplier Avalara for version updates and maintenance necessary to meet the tax obligations of Viapol and its distribution and billing centers.

Interface with key users, identifying priorities and needs, carrying out requirements surveys with the business and translating them into functional and technical specifications for implementing processes in SAP S/4 Hana.

Automation of processes in MM / WM / eWM Logistics, acting as a facilitator between users and operations carried out in the system through barcodes and data collectors.

Contact with global SAP support teams at Tremco USA, ensuring the unification and standardization of common processes between companies.

Coordination and support in the execution of integration tests, training and documentation of all new implementations and improvements made to the SAP system , keeping test records in Panaya software .

Skills: SAP WM / eWM · SAP S/4HANA · SAP Logistics · SAP Implementation · SAP MM

• Project: Tróia -2 Aché Pharma - SAP ECC 6.0 / - SAP S/4 Business Suite on HANA - PE

Business sector : Pharmaceutical Company

Period: Sep/2021 – Nov/2022

Consulting : DXC Technology

Role: Specialist Consultant MM / WM and MES / external WMS Integrations.

Design and implementation of the new WM organizational structure at the Pernambuco - PE plant , integrated with the Automated Vertical Warehouse (BRINT), considering FEFO movements in the a cold chamber and flammable area for raw materials and finished products storage , development functional specifications to integrate the transport orders from WM SAP with automatic movements via AGV's (automated guided vehicles) and also sharing the physical storage bins and stocks & batches control with MES (Rockwell Automation) software for production management and control of weighing booths.

Joint action with the PP -PI modules, controlling the traceability since goods receipt until the consumption via process order and finished product report , where the AGV 's being activated again to move the finished goods produced to the Vertical Warehouse storage, via integration with transport orders created by SAP WM.

Traceability ensured through UD barcodes created on goods receipt, weighing and production, following the movements defined for storage each product in a specific area, as determined in the master data of each SKU in the SAP material master . Data cleansing and preparation of master data creation.

All specific WM movement is carried out by RF collectors and QRCode readers through transactions developed specifically according to the customer's requirements , streamlining movements on receiving and dispatch mats in the Vertical Warehouse, controlling bar code information , manufacturing date, batch number and expiration date of each palletized unit.

Reference project for implementation in other factories . Aché is the first Brazilian pharmaceutical company to have a vertical automated storage system fully integrated with SAP ERP.

- Project: BTS Focus Textil - SAP IS Retail FSH Fashion - SAP Business Suite on HANA - SP

Business sector : Textile and Fashion .

Period : May/2019 – Sep/2021 .

Consulting : Direct contract with Focus Textil

Role: Senior Consultant MM / MRP Retail / SCM Supply Chain Management

Data cleansing and preparation of MRP, purchase and inventory control master data, running MRP Retail in 6 plants in different states of Brazil (SC, SP, ES and PE), each one having different kind of import incentives for a degree of 85,000 SKUs moved, with all their particularities of year, fashion, season and stock segments that involve the fashion market, guaranteeing the data shared with other software and applications used by the company in purchasing and sales areas. SAP Retail installation using SAP Fashion Management (LO -FSH).

- Project: SAP ECC 6.0 – WM Warehouse Management & Bar Codes – Goodyear Americana - SP

Business sector : Rubber – Tire Manufacturing.

Period : Aug /2017 – Aug/2018 .

Consulting : Deloitte Brasil.

Role: Senior WM Consultant

Business design of the organizational structure and internal warehouses for WM implementation at the Americana - SP factory, integrating with the PP module, controlling from the initial production appointment of a tire, to the shipment to the end customer, ensuring the necessary traceability and security through barcodes and RFID's by UD and DOT assigned to each tire and this rack indicated in production appointments, following the FEFO standard of a monthly volume of 5 million units of different SKU's circulating in 70 thousand identified racks. All storage movements are performed by RF collectors and QRCode readers installed on receiving and shipping points, controlling BID bar code information, manufacturing date, batch number and expiration date of each tire produced in the plant.

Data cleansing and preparation of WM views creation.

Reference project for later implementation at Goodyear Argentina .

- Project: SAP ECC 6.0 - New Company Code LDC Transports - LDC Louis Dreyfuss Company – SP

Brazil

Business sector : Agribusiness and Logistics .

Period : Sep /2016 – Jun/2017

Consulting : Neoris.

Role: Senior Consultant of MM and PM modules – SCM Supply Chain Management

Functional design of the organizational structure and implementation of the new company LDC Transports, allowing an estimated saving of 35% of the total expenditure on freight in the outflow of the grain harvest to the various Brazilian ports, allowing the addition of 3rd part drivers and trucks, controlling the entry of trucks in the yards, the stock loaded in each one and the amount of freight to be paid through the electronic card of the customer's payment management administrator, loaded with credits to the driver, where the final amount of freight to be paid is agreed at the end of the unloading and verification of the cargo received and the contracted tolerance limits.

- Project: Spin -off - Product Company and Market Company - Group SEB Brazil & Colombia

Activity Area: Domestic Appliances and Cookware

Period: From Jun/2011 to Aug/2012 .

Consultancy Firm : Direct hiring .

Role: MM-IM Leader Consultant, supporting the SCM Supply Chain team.

Functional design of the new organizational structure and implementation of the spin-off of the company Arno in Brazil in two companies SEB Industrial and SEB Commercial, adding the company IMUSA from Colombia to the group, providing a reduction in expenses of around 30% in taxes between manufacturing and marketing of products in Brazil and Colombia.

Inventory control and internal movement control for finished goods and components, ensuring the effectiveness of inventories and cover the requirements of the sales and production areas, via MRP and MPS executed between the companies and storage centers of the SEB group.

- Project: OneBrazil (Phases I, II and III) – Bunge Alimentos – Santos – SP and Gaspar - SC

Activity Area: Foods & Ingredients / Agribusiness / Sugar & Bio-energy / Port Logistics

Period: From Feb/2006 to May 2011

Consultancy Firm : SAP / Procwork / Essence

Role: MM-IM & WM Leader Consultant, attending the SCM Supply Chain team.

Responsible for designing the organizational structure of the network of more than 200 storage plants and silos for grains, configuring the transfer and stock control operations in MM & WM, together with PM and SD modules, controlling and invoicing the clients for the ship's decommissioning process services, with control of stocks separated by customer and respective import document, at the reception ports of for fertilizers raw materials (TERMAG - Terminal Marítimo do Guarujá) and grains to exports (TGG - Terminal de Grãos do Guarujá), both located in the port of Santos in SP.

Integration of the entire transport network to control stocks used to form export batches on ships, generating savings of more than 30% in losses indicated in bulk weights in the inbound and outbound logistics operation between silos, modal transfers and the shipping ports, controlling the batches and quantities of the grains moved from their exit at the producer to the shipment on the ship for export.

- Project: Implementation - SAP R/3 Version 4.6B – **Sony do Brazil** – São Paulo – SP and Manaus - AM

Activity Area: Electronic Industry

Period: from January 2004 to October 2005

Consultancy Firm : Procwork

Role: MM - IM Leader Consultant, supporting the SCM Supply Chain team.

Design of the new organizational structure for the Manaus factory and their subcontracting suppliers in the Manaus Free Trade Zone, with the implementation of the rollout from Sony Latin America for the SONY do Brazil business units, involving the physical movements and control of inventories of imported materials and their use in products produced in Manaus, guaranteeing the benefits of the Free Zone in specific operations and enabling all necessary control in the operation.

Control of shipments of finished products from the factory in Manaus to the distribution centers in Brasília and São Paulo.

Role: Senior Consultant MM & FI

- Project: SAP Implementation and Functional Support – Version 3.0F – **Henkel Ltda.** – Itapevi - SP.

Activity Area: Chemicals

Period: June 1997 to December 2002

Consultancy Firm : IT Henkel MERCOSUL

Role: Senior Consultant MM – IM & WM, supporting the SCM - Supply Chain team.

Migration from the ERP BPCS used by Loctite to the SAP ERP used by Henkel, after Henkel bought Loctite

worldwide in November 1996.

This was one of the first major SAP implementations in Brazil. The merger of companies involved business units in Brazil, Argentina, Chile, Puerto Rico and Ireland, providing savings of over 30% in common raw material inventories and finished products for each business unit with the use of intercompany MRP, providing scalability and enabling rapid implementation. The template model was created from Brazil and implemented by us for the other Henkel Loctite Units in Mercosur, North America and Europe.

Improvements effectuated at Henkel Plants after the first implementation:

- New Plants of Stock Business Units – **Henkel Brazil** . – December 1999 to May 2000.
- SAP 3 .0F to 4 .5B Migration – **Henkel Brazil** . – August 2000 to December 2000.
- SAP Initial Presentation – **Henkel Porto Rico** – February 2001.
- Distribution Center Implementation in Manaus Branch – **Henkel Brazil** . – April 2001 to May 2001.
- MM & WM Rollout Project - **Henkel Santiago - Chile** . – June 2001 to September 2001.
- MM & WM Rollout Project - **Henkel Buenos Aires - Argentina** . – October 2001 to December 2001.
- SAP Initial Presentation – **Henkel Ireland** – March 2002.

Other Skills

- Participation in the Henkel group's global IT Supply Chain Management meetings, representing MERCOSUR, with accomplishments in Argentina, Brazil, United States and Ireland.
- Good skills in environments that uses SOX, ANVISA/FDA, ISO-9002, QS -9000 and OSHAS -18001.
- Experience with BPCS System and Magnus System

ERP SAP Courses
